Antonios heads the construction practice of Bin Shabib & Associates (BSA) LLP. He is a practising solicitor of the Supreme Court of England & Wales since 1994, and a Greek qualified attorney since 1992, practising in the UAE since 1995, initially with Clifford Chance in Dubai, before joining BSA as a partner in January 2007.

Throughout his practice he has focused on all aspects of local construction industry, acting mainly for international clients and specialising in resolution of disputes arising out of construction projects, and non-contentious aspects in construction to include representing: US engineering consultant in connection with dispute with property developer and local authorities arising from commercial and residential complex project; US engineering consultants on tendering process aspects and on liability issues in possible withdrawing of bid for major development in Oman; Canadian consulting engineer in a series of disputes with local developer arising from non-payment for consultancy services in relation to two major commercial and residential developments in Dubai; Major Korean contractor in dispute arising from extension of warranty of water desalination plant; Scandinavian contractor on recovery of dues and termination of contract with employer for the construction of shopping residential and office complex; British management consultancy and engineering designing company in defending claims by Japanese contractor for deficient design; Japanese construction equipment supplier in agency dispute with UAE national agent; and Swedish specialist subcontractor on contractual review in relation to implementation of residential refuge system.

Antonios obtained his degree in Law from Athens University, and his Master of Laws (LLM) from the University of Southampton. He has delivered various seminars on *UAE construction related legal issues* in the UAE and internationally.
